

THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Asgrow Seed Company

Whereas, THERE HAS BEEN PRESENTED TO THE
Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF *seventeen* YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT (STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

EXHIBIT A Origin and Breeding History of Sybo (XP-C3002) Garden Pea

The original cross between M61180 and Geneva Line 3 was made in 1965 and Sybo was developed by selections from within segregating generations.

Single plant selections were made through the F_6 in 1970 when it was determined that the line was breeding true and that it was a new and distinct type. A decision was made to designate the line as XP-C3002 and to make small scale increases for trial. In the increases of 1971, a very small percentage of an early flowering, taller rogue was found. The frequency of rogues was less than one per thousand. This rogue was approximately three days earlier in flowering and three or four inches taller than normal plants.

In order to be absolutely certain that the line was true breeding, single vine selections were made through the F_{10} in 1974. Although there is no basic difference between the 1971 and 1976 stocks as far as plant type, pod type, and etc. are concerned, the rogue type has been completely eliminated. In addition, 200 single vine selections were made from the 1976 stock. These will be planted as progenies in 1977. Any progeny which is suspected in any way will be eliminated and the remaining progenies will be harvested as a bulk. This will become the breeder's seed stock of the variety Sybo.

Sybo is a stable, true breeding variety with no known rogues or off types.

EXHIBIT B Novelty Statement for Sybo (XP-C3002) Garden Pea

Sybo is distinct from all other varieties known to us. Sybo is susceptible to Fusarium wilt [Fusarium oxysporum pisi (Linford) race 1 Sny and Hn] whereas practically all other varieties are resistant. In addition, Sybo has a growth habit which is very distinct from practically all other varieties in that the plants emerge and remain very small for a matter of about four weeks when they start to grow normally.

The variety which most nearly resembles Sybo is Nugget. The two varieties are easily distinguished, however, in that Nugget is resistant and Sybo is susceptible to Fusarium wilt. The early growth habit is also very different. In our special PVP trial, the Sybo plants on May 27 were completely distinct from other varieties in that they were only three inches tall, whereas practically all other varieties were considerably taller. Nugget plants in the same trial were six to seven inches tall. On July 16, Sybo plants were 24-26 inches tall, whereas Nugget plants were 26-28 inches tall. The above illustrates the growth pattern of Sybo--the plants emerge and remain very small until flowering starts and then the plants grow rapidly and reach the same final size as many other varieties.

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, National Agricultural Library, Beltsville, Maryland 20705. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Give the date the applicant determined that he had a new variety based on (1) the definition in Section 41(a) of the Act and (2) the date a decision was made to increase the seed.
- 13a Give (1), the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. (2), the details of subsequent stages of selection and multiplication. (3), the type and frequency of variants during reproduction and multiplication and state how these variants may be identified and (4), evidence of stability.
- 13b Give a summary statement of the variety's novelty. Clearly state how this novel variety may be distinguished from all other varieties in the same crop. If the new variety most closely resembles one or a group of related varieties; (1) identify these varieties and state all differences objectively; (2) Attach statistical data for characters expressed numerically and demonstrate that these differences are significant; and (3) submit, if helpful, seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty.
- 13c Fill in the Exhibit C, Objective Description form for all characteristics, for which you have adequate data.
- 13d Describe any additional characteristics that are not described, or whose description cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the description of characteristics that are difficult to describe; such as; plant habit, plant color, disease resistance, etc.
- 14A If "YES" is specified (seed of this variety be sold by variety name only as a class of certified seed) the applicant may NOT reverse his affirmative decision after the variety has either been sold and so labeled or published or the certificate has been issued. However, if the applicant specifies "NO", he may change his choice. (See Section 180.15 of the Regulations and Rules of Practice.)
